

# OptraGate®

The latex-free lip and cheek retractor

The gentle solution  
for a better view

# OptraGate®

The latex-free lip and cheek retractor

**The OptraGate® lip and cheek retractor allows the treatment field to be enlarged effectively and comfortably.**

## Considerably enlarged access

OptraGate retracts the lips and cheeks gently and evenly over a large area, allowing a more effective relative isolation of the treatment field. Furthermore, the enlarged access facilitates the dental procedures substantially.

## Enhanced patient comfort

OptraGate is comfortable to wear as it is three-dimensionally flexible. The improved padding of the lip and cheek retractor as well as the recesses to accommodate the upper and lower lip frenulum increase the patient comfort – even during longer treatment sessions.

## Wide range of indications

The lip and cheek retractor is versatile in its application. It can be used, for example, in professional care, direct restoratives, digital scanning, placement of indirect restorations as well as in orthodontic treatment and pediatric dentistry.

Direct restoratives

Pediatric dentistry

Orthodontic treatment

Prosthetics

## Benefits at a glance

- Considerably enlarged access to the treatment field
- Enhanced patient comfort due to three-dimensional flexibility
- Wide range of indications
